

# Backup Optimization

## Reduce backup windows & recovery times

### ESTABLISHED TECHNOLOGY, NEW CAPABILITIES

**Email Archival** - Manage the lifecycle of messaging stores, while maintaining a content index with powerful search capabilities

**De-duplication** - Reduce total data size, optimize WAN efficiency, and simplify storage by reducing redundant copies of data at the file and block level

**eDiscovery** - Respond to litigation holds & requests for electronic evidence quickly and cost-effectively

**Regulatory Compliance** - Enable long-term archival & vaulting to meet business requirements with technology such as WORM

**Online backup** - Protect data without disrupting operations

*The Gartner Group reports that 40% to 50% of all backups are not recoverable in full, and that 60% of all backups fail in general. Ensure efficient, reliable, automated backups and fast recovery times with a solution from North American Systems International.*
