

Disaster Recovery Protecting against Site Failure

ENSURING BUSINESS SURVIVAL

In today's global business environment, data must be available 24x7x365, and preventing data loss is vital to any business's survival. According to a study by PriceWaterhouse Coopers, 7 of 10 small firms that experience a major data loss go out of business within a year.

North American Systems offers a wide variety of business continuance solutions, from high availability solutions and offsite data mirroring processes, to third-party disaster recovery facilities sourcing. Maximize uptime while protecting your data and mission-critical business applications from site, system, application and operating system failures with failover solutions from North American Systems.

"The number one draw to virtualization is cost reduction... But once they have the virtualization software in place, they begin to realize a range of agility benefits that really aren't widely considered right now. The ability to grow and shrink a VM, to move a VM, and to use VM technologies for disaster recovery are benefits that are going to be increasingly important as this trend unfolds." -Tom Bittman, Vice President, Gartner Research
